**ALL PHOTOS TAKEN WITH
YARDSTICK FOR SCALE**

FRT: Fine Road Topping – 3/4" minus Gravel & Sand. This stuff packs tight! Tested @ 2% - 4% minus 200 mesh.

CRT: 2" Minus Coarse Road Mix. Combining 2" rock with FRT (50/50) gives a great packing road topping mix with more rock to hold up to traffic & water better.

SSR: DEC Spec- Shallow Trench Sewer Rock, 1-1/2" to 3/4", also used as Decorative Landscape Rock.

6MT: 6" Minus Tailings – a great base material w/o huge rocks, making thin fill lifts easier. Good on muddy base.

6BL: 6" Minus Tailings Blend. Combining 66% 6MT with 34% FRT gives a better packing base material. Once packed, we've had to rip this stuff to remove it!

DSR: DEC Spec- Deep Trench Sewer Rock, 3" to 1-1/2" rock, also used as Decorative Landscape Rock.

DLN: Ditch Liner, 6" to 3", also used as Decorative Landscape Rock.

RRP: 6" plus Rip Rap, also used as Decorative Landscape Rock.

ALSO AVAILABLE:

- Alluvial D-1 Gravel
- Pathway Pebbles
- Fill Dirt
- Pit Run (Unwashed Gravel)
- Landscape Boulders
- 4" Minus Road Base
- 2" - 4" Drain Rock
